

## Stromme Color White FC

Product No. 3205-20600

Page 1 of 1

Stromme Color White FC a high innovative Product to coloring Stromme Holdcoat FC. After application and drying the coating is slightly white.

The port authority and surveyor can immediately see that the cargo holds are protected. The Stromme Holdcoat FC with Stromme Color White FC is a better alternative to Lime-wash, it can easily be removed with Stromme Aquaclean or other alkaline cleaner.

Stromme Color White FC is approved by FDA and so possible to use for food cargo. Please see FDA Statement.

Before use please shake the drum 1 minute.

Stromme Holdcoat FC should be mixed 1:3 with fresh water. Put app. 10% Stromme White Pigments into the solution. That means: 1 Drum 30kg Stromme Hold Coat plus 90L water= 120L ready mixture. Put 1 drum 13kg Stromme White pigments to the solution. Good mixing all components is important. Apply the solution with effective spray system. After drying the film is light white and you get a good barrier between the cargo and the cargo hold. For more info please read product description. The following information applies to the concentrate. At work use protection cloth, gloves and goggles.
